## **Raymond S. Milman, PE, Honored with Distinguished Member and Fellow Award** *Association for Iron & Steel Technology names it 2010 Distinguished Achievement Award recipient*

**CLEVELAND, Ohio (May 18, 2010)** — Middough Inc., a top ranking U.S. architectural, engineering and management services company, is pleased to announce that Raymond S. Milman, PE, senior structural staff engineer, was selected as the 2010 recipient of the Association for Iron & Steel Technology (AIST) Distinguished Member and Fellow Award.

The AIST Board of Directors presented Milman the Distinguished Member and Fellow Award during the AIST annual President's Award Breakfast at the Iron & Steel Technology Conference and Exposition (AISTech) held in Pittsburgh, PA, on May 4, 2010.

The award was established in 1975 to recognize an AIST member who has attained eminent distinction in advancing the technical development, production, processing and application of iron and steel and/or related activities of the industry and has performed meritorious service to the association.

Milman was recognized for his expert methodology in structural analysis and for sharing this knowledge through AIST presentations, committee activities and published technical papers. His work has resulted in major economic savings and expanded steel industry knowledge relative to mill building design and construction.

"I am very excited to be recognized for my contributions to the steel industry," expresses Milman. "I consider this award as a life achievement award for 32 years of service. I am grateful to my colleagues, peers and clients who nominated and supported my nomination for this prestigious award."

Traditionally candidates are to be nominated for this award by five letters of endorsement, however Milman received seven. "I am honored to recognize Ray's contributions and acknowledge his performance as a leader within the steel industry and appreciate his dedication to the structural engineering profession," explains George Hlavacs, senior vice president and fellow endorser.

Milman has been a member of AIST since 1984 and is a registered professional engineer with more than 40 years of international experience specializing in the power generation, manufacturing, process and metal industries.
